## Insulated transport

The Christoffel® protects paintings against climatological influences, temperature fluctuations, dust, moisture and mechanical influences such as vibrations and impacts. A special transport tool was developed for the Christoffel® that prevents the box from tilting and makes lifting and moving considerably easier. The dimensions have taken account of the standard transportation sizes and a maximum door width of 80 cm. The panels have excellent insulation properties. The FB20 locking system protects against dust and splash water. It offers optimum protection for the objects to be transported and guarantees rapid assembly and disassembly on arrival and departure. Christoffel® is available in an uninsulated and insulated version for conditioned transport. The Christoffel® completely meets the stringent demands stipulated for transportation in the art world.

Dimensions		
Description	Exterior dimensions in	Max. painting dimensions
Christoffel® I	1270 x 390 x 1270 mm	900 x 150 x 900 mm
Christoffel® II	1520 x 390 x 1520 mm	1150 x 150 x 1150 mm
Christoffel® III	1920 x 390 x 1920 mm	1540 x 150 x 1540 mm
Christoffel® IV	2320 x 390 x 2320 mm	1940 x 150 x 1940 mm
Other sizes on request		

## Variable inside, manageable outside

The Christoffel® was developed for the vertical transportation of paintings. This means that the painting is always in exactly the same position during packing, transportation and the exhibition. The boxes are fitted with a buffered frame that protects the painting against excessive mechanical influences. The buffered frame is fitted with a lower beam and corner blocks that can be adjusted along the X and Y axis in order to be able to secure different dimensions and painting sizes. The interior of the transport box is fitted with high quality insulation panels that, in combination with a hygroscopic layer, ensure that the painting is protected against extreme temperature fluctuations and condensation.

## Christoffel® I – II – III- IV

The Christoffel® is available in four standard sizes. The height and length of the box panels is equal, which means that the transport box is suitable for the transportation of both portrait and landscape sizes.

Materials	
Panels	Glass fibre reinforced polyester skin, foam core sandwich panel with a high level of resistance to penetration.
Profiles	Aluminium
Adhesive connections	Adhesive connection between panels and aluminium.
Upholstery	The interior of the panels is fitted with high quality insulation with a hygroscopic protective panel covered in felt. Or LD-29 foam layer covered with felt.
Cushioning interior	LD-45 PE-foam
Dampers	(see specification)

Saint Christoffel (Christopher) is the patron saint of all road users, carpenters, painters, pilgrims, fruit traders, bookbinders, treasure hunters, arquebus shooters, hat makers, gardeners and children and a guardian against infectious diseases, unexpected death, the plague, drought, storms, hail, floods, fire, eye diseases, and toothache and a guardian of the inhabitants of the city of Roermond, where a large statue of him stands on top of the cathedral with Jesus at his shoulder. This city is the home of the only Saint Christopher Cathedral in the world.
