Secure transport

The FB20 Pallet Box is suitable for the secure transport of all your products. The aluminium base of the FB20 Pallet Box can be supplied with different types of fastenings so that the goods can be fixed in the box.

Box sizes

This special box is available in any size.

The FB20 Pallet Box is of modular design with a variable height (maximum of three layers). The box components can easily be connected together. Depending on the length, width and height of the box it is very suitable for return packaging and/or storage with reduced volume.

The box

The durable, sturdy Fawic locking system can withstand all kinds of external influences. During transport, our boxes are really put to the test, but they are more than up to the job. They consist of panels that can be made of various materials up to 20 mm thick. The FB20 Pallet Box offers the best possible protection for all your shipments. The patented locking system protects against dust and splash water.

Return collapsible version

In no time the panels can be folded down completely flat and attached to the aluminium base with a minimum of transport space. They can then be returned to the sender to be used again. Components are the same for every type of box and are available from stock.

Applications

The FB20 Pallet Box is suitable for the transport of components and products from the entire production chain.

Dimensions

	Outer dimensions	Inner dimensions	Collapsibility
Length X	Size X	Size X - approx. 50 mm	
Width Y	Size Y	Size Y - approx. 50 mm	
Height Z			
1 layer	Size Z1	Size Z1 approx. 175 mm	Return height is pallet + lid
2 layers	Size Z2	Size Z2 approx. 175 mm	Return height is pallet + 1st layer + lid
3 layers	Size Z3	Size Z3 approx. 175 mm	Return height is pallet + 1st layer + lid

Materials

Walls and lid	
Sandwich panels	Glass fibre strength woven PP and PP honeycomb core inside
Fasteners	Aluminium
FB20 locking system	Polycarbonate and Zamac
Base	Aluminium

Dimensions

All sizes are possible and collapsibility depends on the dimensions chosen. Of course we can advise you about the different possibilities. The above example illustrates the ratio between the dimensions.

Technical specifications

- Panel thickness: up to 20 mm •
- Dimensions: product-specific •
- Closing force locking devices: approx. 275 kg each •
- Form-fit locking system •
- Protection against dust and splash water •
- Insulating value depends on panel •
- Can be completely disassembled •
- Goods can be fixed in place •
- Can be equipped with: lifting rings, handles, document holder, buffer ring •
